## **DETAILED ACTION**

### Election/Restrictions

This application contains claims 14-22 drawn to an invention nonelected without traverse in Paper filed on 05/27/05. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Goode et al. (USPN 5,507,751).

Goode et al. discloses a cannula having a body including a proximal and distal end, wall surrounding a lumen and a plurality of apertures wherein the apertures have a major and minor axis and the major axis is perpendicular to the longitudinal axis of the cannula. The apertures are eye-shaped or oval and having a plurality of rows and the rows are offset such that apertures have different distances from the distal tip of the body. See figures 1-8. See columns 3-5. Diametrically opposed pairs of slots are shown in figure 1 and disclosed in column 2, lines 47-51.

Art Unit: 3763

Claims 1, 3,6-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Pagan (USPN 6,024,730).

Pagan discloses a cannula 2 having a proximal and distal end. Pagan shows apertures 21A,B that are eye shaped, and the apertures are arranged in a plurality of rows with adjacent rows of apertures having different distances to the distal tip. Pagan further teaches the apertures 21A,B have a major and minor axis wherein the major axis is perpendicular to the longitudinal axis of the cannula. See figures 2-5.

## Response to Arguments

Applicant's arguments filed 10/17/05 have been fully considered but they are not persuasive. With respect to Goode et al. does not disclose a venous cannula, the Examiner disagrees. A "venous" cannula is simply a name which does not impart structural limitations. Goode et al. disclose an apparatus having all the structural limitations as claimed. With respect to the Pagan reference the same response is asserted. Pagan does show a venous cannula with all the structural limitations as claimed. Applicant appears to be amending the claims to provide for the intended use of the venous cannula. The cannula of Goode et al. or Pagan is capable of performing the intended use as claimed. With respect to applicant's arguments directed at claim 12 which sets out the limitation of the 4 longitudinal rows, applicant is directed at figure 1 of Goode et al. Further, Goode et al. disclose 2 pairs of diametrically opposed slots which would be equal to 4 rows of slots.

## Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LoAn H. Thanh whose telephone number is ... (571) 272-4966. The examiner can normally be reached on Mon. - Fri. (First Friday off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nick Lucchesi can be reached at (571) 272-4977. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
